

Field Uniform Washing Instructions

1. Blue field uniform shirt- this part is easy, simply wash in the washer, use delicate cycle, and hang to dry.
2. The next several steps are for the bloomers--here goes: Get your supplies together, bowls (one of soapy water and one of fresh water) and a towel.

3. Hold the bloomers by the back so the fringe hangs down.

4. Gather the fringe in one hand. This will help you keep it out of the water.

5. Dunk several times in mildly soapy water, then wring out. (I use woolite)

Field Uniform Washing Instructions

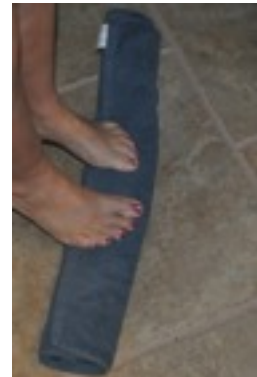

6. Dunk several times in fresh water, then wring excess water out.

7. Lay wet bloomers on a towel, with the fringe up towards waist band. Fold the towel over the lower part of the bloomers, then brush fringe down.

8. Roll up the towel with the bloomers inside, and wring out (I step on the towel to help)

9. Take out and hang up to dry! (I'll hang stuff outside if the weather is nice).

Great Job!! I know this seems like a lot, but it really only takes 5 minutes or so!! Thanks!!
